

Gilliner® 1366D

DESCRIPTION

Gilliner® 1366D is a high impact resistant and high wear resistant liner constructed from woven E-glass and S-glass cloth with nylon surface scrim and polyester resin system to optimize strength, weight, and cost. The combination of E- and S-glass reinforcement yields a higher strength-to-weight ratio as compared to E-glass only. This product also features a resin rich surface to prevent wear through over frame sections and attach points that are associated with repetitive cargo loading wear.

APPLICATIONS

Cargo liners for cargo compartment, bulkhead facing for aircraft. Designed for lower sidewalls where in-service conditions may result in wear through over frame sections, impact damage and/or fastener hole tear out at attach points. 1366D has been successfully used in Boeing 737 cargo bays.

FEATURES

- High impact strength
- High abrasion and wear resistance
- Superior strength-to-weight ratio
- Fire resistant

Flammability		Meets FAR 25.853 & 855 Appendix F Part I & III	

Table shown reflects typical values and should not be used as design specifications.

- ¹ Tensile Strength was tested and calculated per ASTM D638.
- ² Abrasion resistance was tested per ASTM D3389 with CS-10 Wheel, 500 grams of weight, and minor modifications to specimen preparation.
- ³ Impact Strength was tested calculated per ASTM D5420 using a modified dart and specimen test frame.
- ⁴ Edge Bearing Strength was calculated per ASTM D953 using a modified tension loading fixture.
- ⁵ Flexural Strength and Modulus were tested and calculated per ASTM D790.
